

Keep your Communications Software on the Fast Track

With Nuntius as your software development partner, you'll gain:

- ▶ Improved time-to-market
- ▶ Increased productivity
- ▶ Lower overheads
- ▶ Highly optimized code

Take advantage of our unmatched software development expertise in:

- ▶ Telecom
- ▶ Wireless
- ▶ Multimedia

PARTNERING WITH NUNTIUS SYSTEMS

brings experienced resources to communications software development efforts. Communications technology is strategic in today's semiconductor solutions. Exploding demand in electronics has forced many companies to look beyond their in-house expertise to develop and optimize required and complex algorithms. In a fiercely competitive market, Nuntius' software engineers complement your internally staffed projects to deliver effective solutions for rapid product development. Working with Nuntius Systems will help to accelerate project schedules as we produce software components for your products. Utilizing Nuntius' expertise and proven capabilities will increase productivity, cut overheads and deliver the competitive edge: faster time to market. Nuntius professionals work in teams as an extended arm of your in-house development staff as you introduce new products... efficiently, rapidly.

Our approach to meeting your software development and integration needs emphasizes teamwork and reliability. With your product roadmaps and delivery schedules as our guide, we work according to detailed project plans that include milestones, delivery time frames, resource requirements and product deployment details.

Nuntius communications software engineers have comprehensive experience in:

- ▶ Standards Implementation
- ▶ Development Tools
- ▶ Real Time Operating Systems (RTOS)
- ▶ Device Drivers for RTOS and general purpose operating systems
- ▶ Network Stacks & Protocols

Our technical capabilities include:

- ▶ System Analysis & Prototyping
- ▶ Design & Development
- ▶ Optimization & Performance Tuning
- ▶ Systems Integration & Testing

NUNTIUS DELIVERS QUALITY

Through innovation and optimization, a dedicated team of Nuntius engineers works with you to deliver mission critical, time sensitive projects. With considerable expertise on international standards of the ISO, ITU and GSM Association, Nuntius develops software based implementations that are compliant with industry global standards.
